

In the Claims

Please cancel claims 1-9, 11, 19 and 20.

Please amend claims 10, 12 and 16 as follows:

5A,
c1
10. (Twice Amended) A device for detecting the concentration and/or existence of substances in body fluids, said device comprising an access means with [a self sealing] an elastic self closing diaphragm for accessing the interior of the body, said access means implantable in the body and adapted to allow access to the body fluids through said [self sealing] diaphragm.

c2
12. (Amended) The device as set forth in claim 10, wherein said access means comprises a port body, implantable in the skin and comprising [passages] a tube arrangement extending into the interior of the body through which a test sensor may be guided into the interior of the body.

c3
16. (Twice Amended) A method of analysing body fluids comprising the steps of:
providing a port member containing an elastic self [sealing] closing diaphragm for accessing the interior of a body, said port member implanted in the body; and
testing body fluids via said port member.

Please add claims 25 and 26 as follows:

c4
25. (New) The device as set forth in claim 12, said tube arrangement further comprising an intermediate site for receiving the test sensor and for receiving body fluids aspirated toward said site.

26. (New) A method for analysing body fluids, in which a body fluid is accessed for analysis via an implantable means for accessing the fluid, said means comprising a port body implanted in the skin, said port body comprising a tube arrangement extending into the interior of the body, wherein a test sensor is inserted into the interior of the body via said tube arrangement, and wherein a body fluid is analyzed
